Versant Launches Mobile Metric Completion for all Programs

Versant® is excited to announce that as of July 24, 2017 the Versant Voyager® Mobile Application will include **MY IMPACT**. All program participants will have the flexibility to complete Versant Assessments, Metrics and Evaluations, in real-time, from their iPhone, Android, iPad, or any tablet – anywhere, anytime. Simply search your app store for “Versant Voyager,” download the app, and get started!

ABOUT VERSANT

Versant’s mission is to fundamentally improve the quality of patient care through developing and sustaining professional nursing organizations ...One Nurse at a Time®. The company offers the Versant New Graduate Nurse Residency™ – a program for newly graduated nurses transitioning into professional practice, the Versant Transition Nurse Fellowship™ - a program for nurses with experience who transition from one specialty area of practice to another, and professional role development programs such as the Versant Preceptor Role Development Program™. The company also provides the Versant Competencies Assessment, Acquisition and Tracking System™ (VCATS®) for managing the competency performance of the entire nursing workforce. Developing new strategies to successfully onboard new and experienced nurses to maintain delivery of high quality patient care, while reducing the high cost of nursing turnover, is the hallmark of Versant.
